Office Action Summary

U.S. Patent and Trademark Office PTO-326 (Rev. 11/00)

Part of Paper No. ____

Application/Control Number: 10/042,196

Art Unit: 2834

This application contains the following inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Page 2

Group I, claim(s) 1-4, drawn to a method of manufacturing a SAW device; classified in class 29 subclass 25.35.

Group II, claim(s) 5-7, drawn to a surface acoustic device classified in class 310 subclass 313 R.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: There is no general concept to be found. For example, the bonding in the finished SAW (claim 5) need not be "melted" as required by the specific manufacturing steps of Group I (claim 1).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Application/Control Number: 10/042,196
